Dear Sir or Madam,

My name is Sravanthi Bandaru. I have been living in Finland since 2012. I have done my Masters in telecommunication engineering.

Currently I am doing as junior developer trainee in Intergrify Oy since April 2018. Here I have been learning and practicing modern web development technologies like JavaScript, Node, MERN stack, etc. I am part of Intergrify internal student assessment project. Also worked as software engineer in LSI corporation, India. My main responsibilities in work are writing automation python scripts for testing also used C language.

I am very interested to learn new technologies and work on challenging projects. I can work really hard for the growth of the company. I would like to welcome the opportunity to discuss more about my experience and knowledge and how those will be helpful to improve company's growth.

Thank you for your consideration and forthcoming response.

Yours faithfully,

**Sravanthi B**
